

A am a subscriber of XM radio, which I find brings welcome relief from standard broadcasting that too often is geared to appeal to the lowest common denominator. XM radio allows me to choose to listen to whatever I wish, providing excellent quality programming and content. I pay for this privilege, and do so gladly.

I urge you to please REJECT the petition of the NAB (04-160), which would prohibit XM from broadcasting Instant Traffic and Weather and other locally oriented channels. This effort represents one more attempt to control what the public hears and cannot be allowed.

PLEASE REJECT NAB PETITION 04-160.

Thank you.
